

### **AMENDMENTS TO THE SPECIFICATION**

At page 7, line 16, please insert the following after "Figure 5D shows a diagram of a construction connector (header hanger) with color coding.

--Figure 6A shows a diagram of a joint formed by two surfaces and a fastener (screw) with the color coding of the present invention.

Figure 6B shows a diagram of a joint formed by two surfaces and a fastener (rivet) with the color coding of the present invention.

Figure 6C shows a diagram of a joint formed by two surfaces and a fastener (staple) with the color coding of the present invention.

Figure 6D shows a diagram of a joint formed by two surfaces and a fastener (lag bolt) with the color coding of the present invention.

Figure 6E shows a diagram of a joint formed by two surfaces and a fastener (wedge anchor bolt) with the color coding of the present invention.--

On Page 15, after line 17, please insert:

--Figure 6A shows a diagram of a joint formed by two surfaces and a fastener (screw) with the color coding of the present invention. Figure 6B shows a diagram of a joint formed by two surfaces and a fastener (rivet) with the color coding of the present invention. Figure 6C shows a diagram of a joint formed by two surfaces and a fastener (staple) with the color coding of the present invention. Figure 6D shows a diagram of a joint formed by two surfaces and a fastener (lag bolt) with the color coding of the present invention. Figure 6E shows a diagram of a joint formed by two surfaces and a fastener (wedge anchor bolt) with the color coding of the present invention.--
